Energy Transition: post pandemic and looking ahead
Thursday October 22nd 2020 - 15,00/16,30 CEST

Welcome to our fourth and final episode of our #REMenergy2020 webinar series!

In the previous online meetings we focused on how gas and technology will help reach the target of sustainable growth in these unpredictable times.

We are proud of the success of these sessions so far:

In this very final episode we'll move forward, looking beyond this pandemic to see which challenges we'll be facing as to reach energy transition. We hope to see you again for this last insightful session!
