

WEBINAR: E-FUELS & THE ALTERNATIVE OPTIONS TO DECARBONIZE THE TRANSPORTATION SECTOR

19 July 2023 h 3:00 - 4:30 PM

[Register here](#)

This webinar continues the series of events launched by ANIMP Energy Section over the course of last years to support the path of energy transition. From hybrid plants to energy storage solution through hydrogen economy, we have involved international level speakers to offer their view and perspective on these key topics. This year we will deep dive into e-fuels and other alternative options to support decarbonization strategies in the transportation sectors. Our speakers will cover topics ranging from market trends / legislative frameworks to production technologies. Additionally we will present case studies and key insights from the marine and aviation sectors.

AGENDA

- 3:00 - 3:05 PM Introduction - *Lorenzo Stocchino*, ANIMP Energy Delegate
- 3:05 - 3:20 PM Growth opportunities of e-fuels in automotive industry - *Thanigesh Arumugam Parthasarathi*, **Frost & Sullivan**
- 3:20 - 3:35 PM Techno-economic comparisons between the various PtL technologies - *Steffen Voss*, **TUHH (Hamburg University of Technology)**
- 3:35 - 3:50 PM SkyFuelH2 Project - SAF production in Northern Sweden (Sustainable Aviation Fuel) - *Jordan Staiger and Teodora Tinkova*, **UNIPER**
- 3:50 - 4:05 PM E-fuels, Bio-Fuel and other options in the maritime and aviation sectors - *Antonio Lucci*, **RINA**
- 4:05 - 4:20 PM E-fuels: a pathway towards the (indirect) electrification of shipping industry - *Enrico Allieri*, **Assarmatori**
- 4:20 - 4:35 PM Q&A
- 4:35 - 4:40 PM Conclusion
