

MINIMASTER INTRODUCTORY IN PROJECT MANAGEMENT

Presentation

The aim of the MiniMaster is to provide students with a series of insights into Project Management methodologies, with reference to the international **IPMA (Individual Competence Baseline ICB4®)** model. At the end of the course, on a voluntary basis, students will be able to take the exam to obtain the **"Introductory Level in Project Management" certification** issued by IPMA Italy. The contents are based on **some of the Competence Elements (CE)** that constitute the competencies of a Project Manager according to **IPMA ICB4 model**
> [see Certification Regulations](#)

The INTRODUCTORY IN PROJECT MANAGEMENT course is divided into **14 recorded video lessons** and **one live streaming session**. The recorded multimedia material is available on the LMS platform: it consists of videos, slides, and short verification tests at the end of each lesson. The slides presented in the lessons are downloadable in pdf format.

Additionally, other useful documentation is available on the platform to deepen and verify the knowledge acquired during the lessons, such as: IPMA ITALY ICB4 Manual - Individual Competence Baseline, IPMA Certification Guide, Case study to be developed individually.

MINIMASTER IN PROJECT MANAGEMENT PROGRAM

Topics of Recorded Video Lessons

- *Introduction*
- Project Management
- Professional Competencies of the Project Manager
- Project Organization
- Roles and Responsibilities
- Contract and Scope of Work
- Project Start-Up
- Project Close-Out
- Project Breakdowns (WBS-OBS-CBS-RAM)
- Stakeholders: Identification and Management
